CHOICE
Nothing is more history than last year's prescribing information.

The new 2004 PDR®

On average, more than 70% of the drugs found in PDR have updated prescribing information from that found in the previous year's edition. This means that each year thousands of changes are made to:

- Interactions with other drugs
- Contraindications
- Side effects
- Black Box warnings
- Recommended dosages
- How-supplied methods

2004 PDR (Library Hospital Version)

The new 2004 PDR has full-product labeling for new drugs approved in the past year, ... including Zetia, Strattera, Pediarix, Forteo, Humira, Cipro XR, Amevive and many more. You'll find the most complete data on more than 4,000 drugs by brand and generic name (both in the same convenient index), manufacturer, and product categories.

Your 2004 PDR provides usage information and warnings, drug interactions, plus more than 2,000 full-size, full-color photos cross-referenced to the product information. So when you are unfamiliar with a drug, trust PDR to give you the complete prescribing information you need.

In the review of Encyclopedia of Expiration to 1800, by Raymond Howgego (Jul’03, 40-6175), the price was incorrect. The correct price is $175.00. Choice regrets the error.

An editorial error in the review of Rodney Stark’s For the Glory of God (Nov’03, 41-1516) resulted in a misprinting of the reviewer’s original text. The reviewer notes that whether Christianity can be considered truly monotheistic has been a point of contention within Christianity itself. The examples that follow should read “Arianism, Unitarianism” rather than “Aryanism, Unitarianism.” Choice apologizes for misrepresenting the reviewer’s intention.
